# PRESS RELEASE

## G2 Secure Staff Announces Brand New G2 Mobile Website

**Irving, September 29, 2011:** G2 Secure Staff announced today they launched a brand new Mobile website called G2 Mobile for people to access while they're on the run. After the release of their new website two weeks prior, they decided to go mobile. Through the G2 Mobile customers are able to scan services, download wallpapers to their phone, send e-mails straight to the company, email the link to a friend, or share G2 Mobile to their social networks such as Twitter and Facebook. To access the new G2 Mobile site, viewers simply type in the regular website address, [g2securestaff.com](http://g2securestaff.com), and scroll down until they see the Mobile compatible link in blue near the bottom of the page. This is only one way G2 is using innovative technology to connect with current and potential customers.
